(OA8) Online Assignment- Define the Structure

Find the home page of ANY website of interest. Take a screen shot of the site and analyze the site for the site's structure.

1. What is the site's interaction design?
   a. Create a 3 tiered diagram demonstrating the structure of the site and outlining the pages that can be found on your site at each level. You only need to follow three links and an additional three links on secondary pages (this can be handed in to the instructor at the next class).
2. Is the sites information structure obvious or are you left wondering where you might end up?
3. Is the structure consistent from page to page or do things move around?
4. Are there elements of the structure that you would change for the sake of the user's experience or elements that you think were done very well?

In 200-300 words, briefly describe the above questions and the resulting observations you have made about the site you have chosen. Please indicate the URL (www.somesite.com) in your email response as a reference.
